DETAILED ACTION

1. This is a first Office action on the merits of Application Serial No. 10/726,207, which is a divisional of Application Serial No. 10/300,514 filed on 20 November 2002 currently pending.
2. The preliminary amendment filed on 01 December 2003 cancelled claims 43-95. Accordingly, claims 1-42 are currently pending.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40 and 42, drawn to a process of making, classified in class 438, subclass 149.
- II. Claim 41, drawn to a product, classified in class 257, subclass 47.

4. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, another and materially different process for forming the product as claimed does not require a step of depositing a passivation layer on the polyimide substrate. Also, in another and materially different process for

Art Unit: 2822

forming the product as claimed, the curing step may be performed prior to depositing the indium tin oxide coated polyester comprising indium tin oxide coated polyester over the display medium.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. During a telephone conversation with Anthony Laurentano on 05 May 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-40 and 42. Applicant must affirm this election in the reply to this Office action. Claim 41 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Restriction of Species

8. This application contains claims directed to the following patentably distinct species of the claimed invention in Group I:

- A. a method of fabricating a thin film transistor active matrix backplane, wherein the method comprises depositing a protective layer on a source/drain layer (claims 1-40); and
 - B. a method of making a polymer dispersed electronic display, wherein the method comprises depositing a protective layer comprising indium tin oxide coated polyester over a display medium (claim 42).
9. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.
10. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
11. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

12. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
13. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
